Report on Program on Cyber Security For Resilience

Date: 27th April,2018 VENUE : KOCHI

Indo-American Chamber of Commerce-Kerala organized an event on `**Cyber Security for Business Resilience'** on 27th April,2018 in Kochi

Mr. Panish Hangal, Partner, Arka Advisory Services India, Bangalore made the presentation on the subject. Mr. Panish has around 20 years of experience spanning consulting in Cyber Security Strategy/Technology.

While speaking on the subject, Mr. Panish said our legal system must be further strengthened to tackle Aadhar database leak. He also pointed out that in US and European countries, the legal system is so stringent that huge penalty has to be paid for a data breach.

Cyber security is not just about technology and computers. It involves people, information systems, processes, culture and physical surroundings as well as technology. It aims to create a secure environment where businesses can regain resilient in the event of a cyber breach. Email 'phishing' attacks regarding payment requests have implicated numerous clients in recent months resulting in millions of dollars of financial fraud. Information Security Management System (ISMS) implementation leading to ISO 27000:2013 certification can help organisation's with a structured approach for achieving or maintaining their objective, added Mr. Panish Hangal.

IACC-Kerala Chairman, Mr. P. Ravindranth presided over the meeting and gave the welcome and introductory speech
